

ANC Austin Neurological Clinic

DAVID W. MORLEDGE, M.D.
HANA AUBRECHTOVA, M.D.
SARAH N. GRANGER-GLAUSER, RN, ACNS-BC

MONTGOMERY A. VERONA, M.D.
WALTER P. WERCHAN, M.D.

FOUNDED IN 1971

August 6, 2024

Dear cherished patients,

It is with mixed emotions that I announce my retirement from Austin Neurological Clinic as of November 1, 2024. After 34 years of taking care of patients at ANC, I have decided to make a career change and work part time at The University of Texas at Austin, Dell Medical school. I am looking forward to teaching and sharing my clinical experience with those young physicians in training.

I have always considered the practice of medicine to be a calling and not simply an occupation. I truly feel honored and blessed to have been your physician over the last 34 years. Thank you for your trust and friendship.

Below is a list of physicians I would recommend you see after my retirement from the clinic. Most of my patients will be able to establish care with one of the general neurologists at Austin Neurological Clinic. HOWEVER, some of my patients will require a sub specialist for your various clinical diagnoses. Once you have decided which physician you will start seeing, we will send your confidential medical records to them, after receiving a signed release of medical information. If you choose to stay with Austin Neurological Clinic, a release of information is still required to transfer records to one of our many excellent clinicians. Since many neurologists are booked out several months, I would strongly recommend you contact your new neurologist as soon as possible so that there is not a lapse in care.

AUSTIN NEUROLOGICAL CLINIC PHYSICIANS:

Hana Aubrechtova, M.D.

General neurologist, procedures: Botox injections for chronic migraines, dystonia, sialorrhea, spasticity, EEG interpretation

Sarah Granger-Glauser, Clinical Nurse Specialist

General neurology care, DBS programming for Parkinson's disease, Botox injections for chronic migraine headaches and sialorrhea

Christina Saldivar, M.D. (our new addition to the practice)

General neurologist with fellowship in neuromuscular conditions, procedures: Botox injections for chronic migraine headaches, peripheral nerve disorders

Monty Verona, M.D.

General neurologist, nerve conduction and EMG studies, EEG interpretation

Walter Werchan, M.D.

General neurologist, Botox injections for chronic migraines, dystonia, spasticity, EEG interpretation, nerve conduction studies
